GitHub: github.com/Beastaleast

Professional Summary

- **Developer Profile**:

  Computer Science undergraduate with hands-on experience in **JavaScript**, **React.js** and responsive web development. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming. Developed an **AI-based real-time posture detection project** using computer vision and webcam processing, along with a **React.js frontend** and backend services. Seeking a Developer role to contribute to AI-based and production-oriented software projects.

Technical Skills

- **Programming Languages**: **JavaScript**, Java
- **Frontend Development**: **React.js**, HTML5, CSS3, Responsive Web Design
- **AI / Computer Vision**: **AI-Based Projects**
- **Database**: MySQL
- **Development Tools**: Git ,GitHub, Postman
- **Core Concepts**: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Experience

- **SYNTECHXHUB** Internship
  Web Development Intern *15 July 2026 – 15 August 2026*
  - **Web Development**: Successfully completed a one-month Web Development Internship Program, gaining practical exposure to web development concepts and development workflows.
  - **Development Experience**: Participated actively in the internship program and strengthened hands-on understanding of building and working with web-based applications.
  - **Professional Learning**: Worked in a structured internship environment and gained practical experience with software development practices, problem solving, and project-oriented development.

Projects

- **AI-Based Real-Time Posture Detection System**:
  - **Developed an AI-based posture detection system** that uses webcam-based computer vision to identify incorrect sitting posture in real time.
  - **Implemented real-time posture analysis** to monitor body position and provide immediate feedback when incorrect posture is detected.
  - **Built the frontend using React.js and Vite** with responsive interfaces for webcam monitoring, live posture status, alerts, dashboard visualization, and posture history.
  - **Integrated computer vision and AI-based processing** for continuous analysis of posture data from the user's webcam.
  - **Developed REST API integration** between the frontend and backend for user data, posture records, and monitoring history.
  - **Implemented WebSocket communication** for delivering real-time posture status and alerts.
  - **Tech:** Python, React.js, Vite, Java, Spring Boot, MySQL, REST APIs, WebSocket, Computer Vision, MediaPipe
- **Admin Portal for GGP (GOOD Gut Project)**:
  - **Developed a responsive web-based admin portal** for managing applicant records and administrative workflows.
  - **Built responsive UI components** for mobile and desktop environments to improve usability for non-technical users.
  - **Integrated REST APIs** to enable reliable data communication between frontend and backend systems.
  - **Used Git/GitHub** for version control and structured collaborative development.
  - **Tech:** JavaScript, HTML5, CSS3, Git, GitHub, REST APIs

Education

- **ABES Institute of Technology** Ghaziabad, India
  B.Tech - Computer Science Engineering; *CGPA: 7.56/10* *2023 - Present*

Achievements

- **Smart India Hackathon 2025**: Participated in Smart India Hackathon 2025 and other hackathons.
- **Ideathon 2024**: Participated in Ideathon 2024 at college level.

Certifications

- **Database Management System – Part 1** – Infosys
- **Database Management System – Part 2** – Infosys
- **Data Structures** – CodeChef
